

Bulk Add Engage Points

Last Modified on 11/30/2022 12:38 am EST

Bulk Add Engage Points is a streamlined process where you can select which attendees you wish to add points to. This is done by selecting and awarding a specified goal to the selected attendees.

The steps are as follows:

1. Select the Goal you wish to assign to one or more attendees.
2. Filter for the desired attendees.
3. Optionally, check the Push Notification checkbox if you wish to send a notification of the award to each selected attendee.
4. Select Start. Once started, the bulk assignment runs in the background, allowing you to perform other actions during this time.
