

Getting Started with EventsAir Pay

Last Modified on 02/11/2025 8:58 pm EST

EventsAir Pay is a service we offer in two different ways:

EventsAir Pay powered by Stripe

(Gateway & Processing Service offer)

EventsAir Pay powered by Airwallex

(Embedded finance/Banking as a Service offer)

Please search this help site for more information on each option.

Both solutions can be easily integrated into your registration sites to give your attendees a faster, more secure, and more streamlined payment process.

You can dramatically improve your attendees' payment experience, reduce abandoned carts and denied payments, and spend less time chasing and reconciling funds.

- In most cases*, EventsAir Pay supports credit/debit cards, Apple Pay, Google Pay, and WeChat Pay. [*EventsAir Pay powered by Stripe doesn't yet support Apple Pay.]
- In many countries, there's Tap to Pay functionality, so you can use your phone or mobile device to accept payments at events.
- See transactions in your account and minimize bank fees.

Airwallex option only:

- Take payments in most countries and currencies, and exchange currencies in your Wallet at your preferred timing.
-

To add EventsAir Pay to your EventsAir platform, please reach out to your Account Manager or contact accountmanagement@eventsair.com.
