

# Using Multi-Currency in EventsAir

Last Modified on 02/16/2025 4:27 pm EST

The multi-currency feature in EventsAir lets you assign values in other currencies for registrations, function tickets, etc. These different currency amounts can then be added to different interactive (registration) sites – one for each currency – by cloning your original site and making a few changes.

## Before you set up multi-currency

First, ensure your bank or financial institution allows your account with them (merchant account) to accept different currencies. You may need merchant sub-accounts for each currency, or possibly different merchant accounts for different currencies or regions. You may choose to have multiple e-commerce accounts (payment gateways) for each currency you're working with. Alternatively, you may have a payment gateway that accepts multiple currencies. Ensure you have all of this set up beforehand.

Once you've enabled multi-currency in your event (see instructions below), you can configure your payment gateway(s) and registration sites to suit your attendees' needs.

For more information on setting up gateways in EventsAir read our [External Connections – Gateways](#).

### Consider how you'll communicate multi-currency options to your attendees:

After you've completed the steps below, you can also review your Merge Docs to ensure the correct registration site links are included.

To include amounts in other currencies in Merge Doc emails, for any element involving a fee or cost (Registrations, Functions etc.), look under the Fields Tab for that element, and select the **Foreign Currency Amounts** checkbox.

## Step 1: Add currencies (to all events)

Create a list of supported currencies for EventsAir (for all events). From the event selection page, choose **Application Setup**, then **Currency**.

Good afternoon, d.moreno! You have 12 events.

View all events by month by year

FAVE	NAME	START	DURATION	LOCATION	ALERTS	TYPE
★	Cyber Education International - 15th Annual Summit	Mar 29, 2023	1 day			Event
★	Early Education International - 1st Annual Summit	Sep 2, 2024	2 days		1 2	Event
★	Master Contact Store	Jan 12, 2024	1 day			Contact
★	Totally Imaginary 2026 Conference	Aug 1, 2026	7 days		1	Event

## Step 2: Define exchange rates for an event

Inside your event, go to the **Setup Panel** and select **Event** (top right).

**Setup**

MODULE SETUP

- Contact: Enable optional contact fields and create followup actions and Agent groups group management
- Notes: Create note categories to capture comments and special requests for attendee or contacts
- Marketing: Create marketing tags to categorize attendees with a variety of data, such as date, text, number and multiple option choices
- Survey: Create a variety of survey and live poll question types, including multiple choice, scales, ranking, and more
- Registrations: Create multiple registration types, fee structures, inventory levels, accompanying person types and discount codes
- Functions: Create functions and activities with date/time, inventory levels, fee types, locations, and other function specific details
- Accommodation: Create hotels with detailed descriptions, room types, room and hotel inventories and detailed rate information
- Travel: Create travel types, sectors, transfers, itinerary information, and both individual and group travel details
- Presentations: Create details to collect speaker information, presentation types, session info, room assignments.

SYSTEM SETUP

- Event**: Configure event settings such as modules enabled, access rights, contact store, event logo and analytics
- Brand: Configure the style and format of your Interactive sites, portals and apps, including colors, fonts, and font sizes
- Financial: Configure tax details, payment types, bank accounts and credit card gateways for your event

ADVANCED SETUP

- Accounting: Configure accounts and enable optional features
- Packages: Create module items to be included in a Package
- Project Manager: Add team members used in the Project Manager
- Run Sheet: Add team members and locations for use in the EventsAir run sheet function
- Name Badge Editor: Create custom name badge layouts for any kind of badge Merge data from any field in EventsAir, add graphics and QR codes

Under **Event**, select **Preferences**, tick the **Enable Multi-currency** box, and **Save**.

## Preference Setup

[Details](#) | [Modules](#) | [External Connections](#) | [Access Rights](#) | [Invoice Header](#)

**Name\*** Cyber Education International - 16th Annual Summit

**Type\*** Event

**Alias\*** cyber-education-interna ✔

**Start Date\*** 09/10/2023 📅

**End Date\*** 11/10/2023 📅

**Event Location Time Zone\*** (UTC+10:00) Brisbane

**Event Currency\*** Australian Dollar - AUD

**Enable Multi-currency**

**Event Group** Please select...

Next, select **Exchange Rates** from the left-hand menu and set what you want to nominate as each currency's exchange rate.

These rates do NOT update automatically when the market exchange rate changes.

You can come back to update these at any time before or during your event and the changes will be reflected on your event items.

## Event Currencies and Rates

[Details](#)

	NAME	EXCHANGE RATE	LAST UPDATED
Event Currency	Australian Dollar - AUD	\$ 1.000000	
	Euro - EUR	€ 0.650000	Nov 30, 2023 3:25 PM <span style="float: right; color: red;">✕</span>
	New Zealand Dollar - NZD	\$ 1.200000	Nov 30, 2023 3:25 PM <span style="float: right; color: red;">✕</span>
	US Dollar - USD	\$ 0.750000	Nov 30, 2023 3:25 PM <span style="float: right; color: red;">✕</span>

[Add Exchange Rate](#)

## Step 3: Add Multi-Currency for each Fee Type

For each item within your event, you can choose which currencies are accepted and, if you wish, override the calculated exchange rate (to allow for exchange rate movement).

To do this:

1. Navigate to the **Setup Panel**.
2. Select the module with the fee type you want to edit (e.g., **Functions, Registrations**, etc.)
3. Select the appropriate item (such as **RegistrationType: Early Registration**).
4. Review the list of available exchange rates and enable the ones you want to make available.
5. You can also override the calculated fee (to build a little extra margin to account for changes in the actual rate).

For example, in the example below, you could change US\$80 to US\$95, simply by entering that amount instead in the USD box.

## Registration Type Setup

**Details**   Payment Schedule   Advanced

**Name\***   Non-Member

**Registration Group\***   Registrations

**Amount**

<b>Event Currency AUD</b>	100.00	<input checked="" type="checkbox"/> Enable Multi-currency
<b>EUR</b>	60.00	<input type="checkbox"/> Enabled
<b>NZD</b>	110.00	<input type="checkbox"/> Enabled
<b>USD</b>	80.00	<input type="checkbox"/> Enabled

#### Step 4: Build your interactive (registration) sites

To offer online registration showing different currencies, you need to build an interactive (registration) site for **each currency**.

This is pretty easy to do since you can clone sites and modify the currency in just a few keystrokes.

1. Create, clone or open the **Interactive Site** you want to work with.
2. Select the **Details** Tab.
3. Select the **desired currency** for this Interactive Site.

4. If you want to use a different **E-Commerce Account** (Gateway), select the check to override the default.
5. Select the new **E-Commerce Account** (Gateway) you want to use.
6. Enter an **E-Commerce Reference**, which describes this in a few words (this is very useful when auditing your credit card transactions and helps identify which event the charge is associated with).
