

# Surveys module (setup)

Last Modified on 12/13/2024 5:02 am EST

- The Surveys module is part of the **Setup** panel, because you create a 'bank' of questions for your entire event here.
- Building individual surveys, sending them out, and managing results usually all happens in the **Communications** panel.
- Once you've built a survey, you can also add a Session Survey to various sessions, in the **Presentations module (Setup Panel)**; or add a **Meeting Hub survey** to your Attendee App / OnAir portal (**Online Panel**).

Please search this site for complete guides and information on various Survey question types and how to use them.
