

How do I select a different e-commerce account for specific interactive sites?

Last Modified on 11/25/2024 4:13 am EST

In some cases, you may want an interactive (registration) site in your event use a different e-commerce account (i.e. not the default one set in Event Preferences).

You should:

1. Navigate to **Online Panel**.
2. Open the **Site Builder** for the online interactive site.
3. Click on the **Details Tab** to see where you can select the option “**Override Default Event E-Commerce Account**”
4. Select the E-Commerce account from the dropdown list (assuming you previously set up your other e-Commerce account) and enter the e-Commerce Reference.

This will allow you to process payments on this particular Interactive Site through an e-Commerce account other than the default one for this event.

The screenshot shows the 'Interactive Site' configuration page in the Site Builder. The 'Details' tab is active, and the 'Override Default Event E-Commerce Account' checkbox is checked. The 'E-Commerce Account' dropdown is set to 'Centium Test Gateway' and the 'E-Commerce Reference' is 'eventname'. The 'Title' is 'Interactive Site', the 'Alias' is 'registration', and the 'Brand' is 'Event Brand'. The 'Currency' is 'Australian Dollar'. A QR code and a URL are also visible.

Field	Value
Title*	Interactive Site
Alias*	registration
Brand*	Event Brand
Currency*	Australian Dollar
Override Default Event E-Commerce Account	<input checked="" type="checkbox"/>
E-Commerce Account*	Centium Test Gateway
E-Commerce Reference*	eventname
