

In the Presentation Portal, what's the difference between Supporting Documents and Additional Documents?

Last Modified on 11/25/2024 5:03 am EST

Supporting Documents are documents you want speakers/presenters to upload when they submit their abstract. You can enable up to 5 Supporting Documents in the Presentation Portal. For example, a Biography, or an image.

An **Additional Document** is a document you want the speakers/presenters to upload after they have submitted their abstract. You can enable up to 3 Additional Documents in the Presentation Portal

Additional Documents also give you the ability to only allow papers to be uploaded that have a particular Paper Status and/or between particular dates. A good example of this would be a Final Paper, which you would only want the Accepted Speakers to upload after a particular date.

For more on the topic of Abstract & Presenter management, search "Abstracts" in our [Education Resources](#) section.
