

Why are Functions not appearing on my interactive site?

Last Modified on 11/24/2024 11:35 pm EST

To appear in a site, Functions must have a **Fee type** setup against them.

1. In the **Setup Panel**, choose the **Functions** module
3. Select the **name of the Function** from the left-hand menu
4. Click **+ Add Fee Type**
5. Create a name for the fee type (e.g. Platinum Ticket) and a price if applicable.
6. Once you have this set up, you can go the **Online panel** to edit your **Interactive Site**.
7. For the function you've created the fee type for, click the **cog icon** (settings) on the **right**.
8. Drag your new **Fee type** into the builder screen:

9. Save your changes.
