Why can't I have multiple sessions in the agenda with the same name?

Within each module, such as Agenda, the system is going to ask you to create a unique name each time (as this is needed to differentiate between sessions).

For example, if you're holding a 3-day event with a Morning Break session each day from 10-10:30am, you are unable to name this session 'Morning Break' for all three days. Trying to do this will result in the error message below:
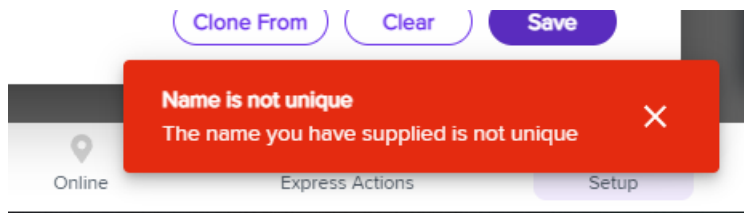

To allow your Agenda to be set up properly, you can add something to the name to make it unique, for example:

- **Example 1:** Morning Break Day 1, Morning Break Day 2, Morning Break Day 3

- **Example 2:** Monday Morning Break, Tuesday Morning Break, Wednesday Morning Break
