

Why do my accommodation search dates not match my inventory dates?

Last Modified on 11/25/2024 1:12 am EST

When the accommodation module is first added to an interactive (registration) site, it will automatically detect your hotel inventory dates.

If you make updates to your accommodation inventory dates later, you'll also need to update the interactive site:

1. Navigate to the **Online Panel**.
2. Open the **interactive (registration) site** – you'll be in the drag-and-drop builder.
3. Navigate to your **Accommodation** module.
4. Click the **Setup Cog** to open the details.
5. Once opened, click on the **Details Tab**.
6. Scroll down and you will see a field labeled **Check-In Date Range** .
7. Change this value as needed and save the site.

Accommodation Builder **Details** Logic

Search Options

Check-In Date Range From 06/07/2023 to 14/09/2023

Check-In Label: Check-In Date
