

How do I fix an itinerary that displays in the wrong order, due to flights going across time zones?

Last Modified on 11/25/2024 12:09 am EST

This can be sorted by enabling the time zones.

1. Navigate to the **Setup Panel** .
2. Click on the **Travel Module**.
3. Select **Preferences** .

1. Check the box called **Time Zone**.
2. Once enabled, click on each of your sectors and for each of depart and arrival ports, and set the time zones.
3. Once those have all been set, you'll find that if you generate your itinerary, it should be showing the correct order.
