

# Why can't I change the contact details on an issued invoice?

Last Modified on 03/02/2025 8:49 pm EST

## HOW-TO:

① NOTE: Editing invoices can interfere with accurate record keeping. To maintain the integrity of your audit trail in EventsAir, invoices should be reversed with a credit note and re-issued.

### Attendees panel

1. Find the contact
2. Select each item (registration, function, etc) with an outstanding value, change payment status to “canceled” (override cancelation fee optional)

📄 This creates a credit note to reverse the previous invoice. Do this before updating the details, so the credit note matches the original invoice.

3. Select the dollar sign icon under "Actions" (*Payments, refunds, invoices, and audit trail*)
  4. Under invoices, preview to check details on the credit note, click Issue
  5. Update necessary details
  6. Go back to the item(s) you canceled, and change payment status back to Purchase
  7. Return to *Payments, refunds, invoices, and audit trail*
  8. Under invoices tab, issue the updated invoice
